FABLE

La materia che si fa racconto...

Matter that becomes a story...

Un'estetica che nasce dalla stratificazione, dove ogni segno racconta una storia di equilibrio e materia. La pietra diventa superficie contemporanea, capace di dialogare con architetture diverse, tra rigore e naturalezza.

Tracce sensibili...

Sensitive traces...

An aesthetic born from layering, where every mark tells a story of balance and material. Stone becomes a contemporary surface, capable of dialoguing with different architectures, between rigor and naturalness.

Ombre che brillano di un'intensità interiore.

Shadows that glow with inner intensity.
